Art Unit: 2833

1. Applicant is kindly requested to submit a clear statement concerning the priority claimed in this application. The cover sheet from the initial filing indicates that it is a Continuation **and** a CIP of the same application – 09/235785. The signed Declaration again lists this application twice, with two different filing dates, and adds another application – 08/865921. The first paragraph of the specification should also be corrected.

2. The drawings are objected to because;

- a. in Fig. 31, **84** (at the bottom) should be **84A**,
- b. in order to be consistent with the specification (page 15, line 1), in Fig. 31, **136A**, **138A** and **140A** should be changed to **136**, **138** and **140**, respectively,
- c. in Fig. 40, **166A** lacks a lead line, and
- d. contrary to page 17, line 7, member 157A in Fig. 38 does not appear to be an opening; an opening cannot have shading marks.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

3. The sentence on lines 12-14 of page 16 is unclear. It is incomplete and reference numeral 183A is used to identify three different parts.

4. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

5. Claims 1, 2, 5 and 10-12 are objected to because of the following informalities:

On line 20 of claim 1, it appears that -arm- should be inserted after *contact*.

On line 21 of claim 1, "a fourth contact coupled to" should be deleted as redundant.

On line 17 of claim 2, it appears that -third- should be inserted after *said*.

Claim 5 is somewhat redundant. It appears that this claim should be dependent upon claim 2 (as in the patent).

Claim 10 lacks antecedent basis for "said at least one second movable contact" on line 22. Also, on that line, it appears that "as" should be -an-.

In claim 11, it appears that most of lines 13-14 should be deleted as redundant.

On line 3 of claim 12, it appears that "an" should be changed to -and-.
Appropriate corrections are required.

6. The following is a quotation of the first paragraph of 35 U.S.C. 112:
The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
7. Claims 1-12 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The specification fails to describe a screw terminal used with a rocker section having a double throw switch and third and fourth contacts "of a screw terminal." The third and fourth terminals on this type of section, as seen from the earlier embodiments are not secured near the side walls. There is no explanation of how the disclosed screw terminals could be added to these third and fourth terminals.
